

Cole Younoszai

Denver, CO — Willing to Relocate

(720)-666-8202 — coyo5211@colorado.edu — LinkedIn — GitHub

Professional Summary

Computer Science student at the University of Colorado Boulder with hands-on consulting experience implementing enterprise software for government clients. Skilled in translating client requirements into technical solutions, configuring and testing system changes, and presenting deliverables to stakeholders. Proficient in C++, Python, SQL, and data visualization, with a track record of leadership and cross-functional collaboration.

Education

University of Colorado Boulder

Expected May 2027

B.S. in Computer Science — GPA: 3.7

Relevant Coursework: Algorithms, Numerical Computation, Database Systems, Data Science, Data Structures

Technical Skills

Languages: C++, Python, C, SQL, JavaScript, HTML/CSS, Scala

Core Competencies: Client Requirements Gathering, Software Implementation, Stakeholder Presentations, Data Analysis, Object-Oriented Design, Front-End Development, Team Leadership

Work Experience

Implementation Consultant Intern – FAST Enterprises

May 2026 – Aug. 2026

Des Moines, IA

- Partner with state Department of Transportation clients to gather requirements and improve driver services software, translating business needs into configured system solutions.
- Implement and test software changes for government client systems, ensuring accuracy and compliance with client specifications ahead of go-live.
- Present implemented solutions and system updates directly to government stakeholders, building client-facing communication and consulting skills.
- Collaborate with cross-functional project teams to troubleshoot issues and manage implementation timelines for public-sector software rollouts.

Mentor/Intern – OPALS, Center for Energy Research

Sept. 2024 – Aug. 2025

San Diego, CA

- Mentored 6 high school students through the full lifecycle of computational research, from data collection through publication.
- Analyzed and visualized battery performance data using Python and Excel to support ongoing research findings.

Program Leader – Roundup River Ranch

Apr. 2025 – Aug. 2025

Gypsum, CO

- Led outdoor programs for groups of up to 14 children with life-threatening chronic illnesses, adapting activities to individual medical needs.
- Coordinated and managed 4 volunteers weekly, overseeing programming logistics and childcare support.

Community Center Lead – University of Colorado Boulder

Dec. 2023 – Present

Boulder, CO

- Manage a 15-person staff, building schedules and overseeing daily front-desk operations for residence hall facilities.
- Streamlined administrative processes using Excel, improving operational efficiency for hall operations.

Projects

Song-Seeker Website – JavaScript, HTML/CSS, SQL

Oct. 2024 – Dec. 2024

- Built a full-stack music recommendation website with playlist creation, search, and user account features.
- Integrated Spotify and Last.fm APIs and designed a SQL database schema to support efficient user data queries.

Physics Engine – C++

Jan. 2025 – Apr. 2025

- Engineered a real-time 2D physics simulation in `wxWidgets` featuring collision detection and motion tracking.
- Optimized rendering and calculation logic to maintain smooth frame rates under complex simulation loads.

President – Kappa Theta Pi (Nu Chapter)

Dec. 2023 – Present

- Lead operations for a 60+ member national professional technology fraternity, overseeing chapter strategy and events.
- Organized recruitment, networking, and mentorship programming that strengthened members' job placement outcomes and professional readiness.
